ADVANCE YOUR CLINICAL SKILLS • LEARN FROM THE EXPERTS • SECURE YOUR FUTURE!

WHAT IS SCI? The Scleral Consultative Institute was developed by the world's foremost experts in specialty lens fitting, in partnership with industry, to advance your scleral lens skills and propel you to leadership in specialty lens practice management.

OUR MISSION: To provide elite training in scleral lens evaluation, management, billing and coding. This unique educational experience for the practitioner accelerates participants from little or no experience to complete competence over a weekend long course. Participants learn from didactic lectures, hands on fitting, and troubleshooting live patients with pathology.

THE SETTING:

Dr. Sonsino's
3,000 sq foot
specialty
anterior
segment private

practice. With 5 examination lanes and top-of-the-line equipment for evaluating contact lenses, this practice functions at the highest level of the profession.

PROGRAM HIGHLIGHTS:

The weekend begins with a Friday night mixer, followed by a full Saturday of lecture and hands-on application, lens assessment & troubleshooting, as well as a detailed billing & coding course covering both Vision Care Plans and Medical insurances. Saturday closes with a comprehensive review and an always lively Q&A session. Sunday morning is spent fitting & assessing actual patients with pathology and putting your newly developed scleral fitting skills into practice!

LEAD BY EXPERT FACULTY:

Mile Brujic, OD

World class scleral lens practitioner,
researcher and lecturer.

Jeffrey Sonsino, OD

Diplomate, Cornea, Contact Lens, and
Refractive Technologies and past

chairman of the AOA Contact Lens and Cornea Section. Dr. Sonsino is a fellow of the Scleral Lens Education Society and the 2017 GPLI Practitioner of the Year.

Randy Teller, COMT Practice manager, scleral lens technician, lecturer.

TUITION: \$2,500 Educational Value for FREE!

- Entire Weekend SCI Course
- Handouts & Resources for Scleral Lens Practice Implementation & Success
- Food/Drink/Scheduled Entertainment
